

# TAU

**A decentralized messenger  
that fairly rewards your work and passion to a community**

# Killer app

## A messenger brings opportunity and compensation

- A chat app “similar” to Telegram or WeChat user interface with a *bit* more ...
  - Blockchain coins circulation: each community issues FIXED 10 million coins, through which members make uncensored trades, advertisements and **money**.
  - Server-less and permission-less platform: phones form up social network independent from any central server.
  - Parallelism: there could be millions of community independent from TAU.
- Initial users are torrent video sharing fans.

# **Each community has value.**

## **Discovering social value through transparent coins circulation**

- Any group of digitally connected people has potential value.
- Fixed amount of crypto-coins in the group will discover such potential.
- The more loyal members join, the higher coin value is.
- When a commonwealth created, better content and service evolves.

# Technology gap

**Missing decentralized, anti-spam and permission-less communication technology**

- “Big Tech”, such as Amazon, Uber and YouTube, are centralized with deletion power over users **without** negotiation. Such power also exists in traditional group admins.
- Web and app servers block data transparency and community independence.
- Low scalability of crypto technologies ranging from BTC to EOS are not feasible for global consumer use.

# **TAU enables a server-less, permission-less, high scaling, mobile mining parallel blockchains technology.**

- Communication is at the core for digital applications of messengers, Uber, Priceline or Amazon, etc.
- Novel communication ability will incur new ideas that bring uncensored blockchain economy with fairness.
- Core technology innovation
  - Distributed Hash Table - TAU DHT multi-level cache over-lay communication protocol
  - Peer to Consensus - Proof of Transaction, POT, as blockchain consensus to regulate spam and hacking
  - Full mobile device mining and networking

# Team and privacy

**Due to nature of the innovation, we do not disclose team members.**

- Technology skills
  - Big data and cryptographic processing
  - Telecom and mobile phone expertise
  - Blockchain consensus research
  - Java, c++ and android dev
- Business experiences
  - NYSE and Nasdaq listed tech companies founder
  - Committed long term mindset
  - 50 global telegram groups administrators with quarter million user registration
- All source code is open and free, except for the ONE TAU genesis secreete key.
