TAU - decentralized messenger

Bring blockchain coins economy into every community

Every community has value.
Discover social value through coins circulation

- A group of digitally connected people shall have realizable but undefined potential value.

- Cypto-coins issued in FIXED amount will help discover such value potential.

- The more loyal members join, the higher total value a community achieves.

- When a commonwealth created, quality content and service offering starts. A economy with coins circulation will happen.

Technology gap
Decentralized and immutable communication tech missed

- "Big Tech", such as Amazon, Uber and YouTube, are centralized with deletion power over users. Such power also exists in group admins.

- Web and app servers inhibit data transparency and community financial independence.

- Low scaling of state-of-art crypto coin technologies from BTC to EOS are not feasible for global consumer use.

TAU enables decentralized communication
Server-less, mobile independence, high scaling parallel blockchain tech stack

- Communication is the core for every digital application

- Only a decentralized communication brings real uncensored blockchain economy.

- Features: no server, everyone can join permission-lessly, open source, open data, unlimited scale in blockchain transactions.

- Core technology innovation

  - Distributed Hash Table - TAU DHT overlay communication protocol

  - Proof of Transaction as blockchain consensus

  - Full mobile device computing and networking

Killer app
Decentralize messenger as a proof of technology from TAU development

- A chat tool similar to Telegram or WeChat as user front.

- Serverless - smart phones forms network independent from any central server.

- Each community will issue 10 million coins to operate an economy among members. There will be millions of community

- Initial community marketing targets: torrent file sharing and gaming.

Team and privacy
Due to the nature of product, we do not disclose team members

- Technology skills obtained

  - Big data and cryptographic processing

  - Telecom and mobile phone expertise

  - Blockchain consensus research

  - Java, c++ and android dev

- Business experiences

  - NYSE and Nasdaq listed tech companies founder

  - Committed long term mindset

  - 50 global telegram groups administrators with quarter million user registration
